

Unleashing Your Skin's Innate Radiance

BIO-GLOW: Illuminate. Perfect. Renew.

A Meticulously Engineered Bio-Active Solution for Cellular Clarity.

The Three-Dimensional Transformation

- **Illuminate:** Unparalleled brightness and even tone via biological intervention.
- **Perfect:** Visible pore tightening and texture refinement.
- **Renew:** Accelerated regeneration for resilience.

Beyond Surface Beauty: Addressing Modern Skin Challenges

We address the root causes of cellular fatigue by countering specific factors:

Challenge: Excess Melanin

Solution: Correcting hyperpigmentation and uneven complexion.

Challenge: Matrix Breakdown

Solution: Restoring Collagen & Elastin integrity to fix enlarged pores.

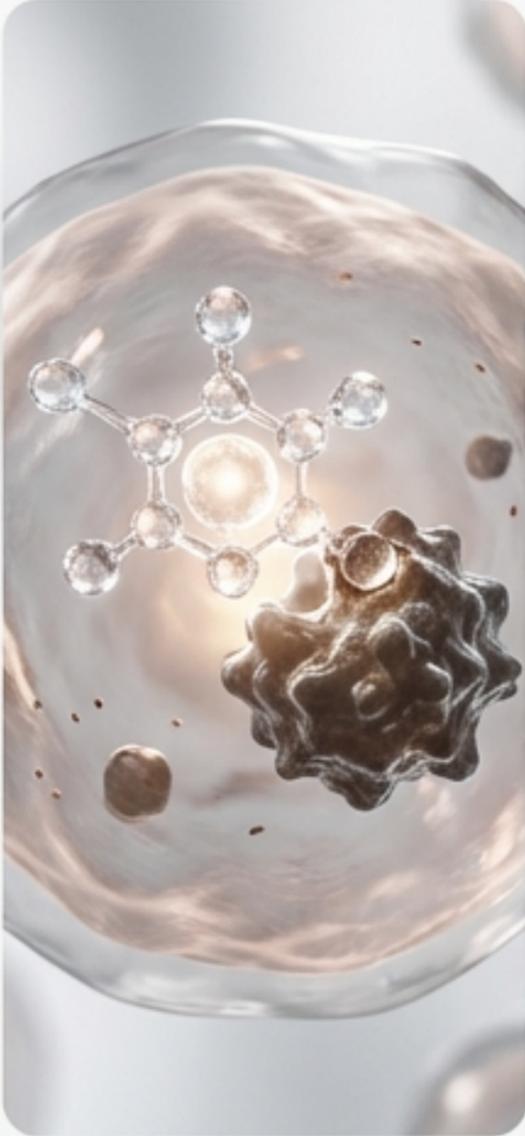

Challenge: Sluggish Turnover

Solution: Reversing dullness and delayed healing.

The Tri-Active Formulation: Mechanism of Action

A synergistic fusion of Glutathione, PDRN, and Bio-Mimetic Peptides.

The Illuminator (Glutathione)

Role: The Master Antioxidant.

Mechanism:

- **Tyrosinase Inhibition:** Direct blocking of the enzyme responsible for melanin production.
- **Pheomelanin Shift:** Biologically shifts synthesis from dark eumelanin to lighter pheomelanin.

Outcome: Glass-Like Clarity, reduction of PIH (Post-Inflammatory Hyperpigmentation), and Melasma.

The Perfector (PDRN)

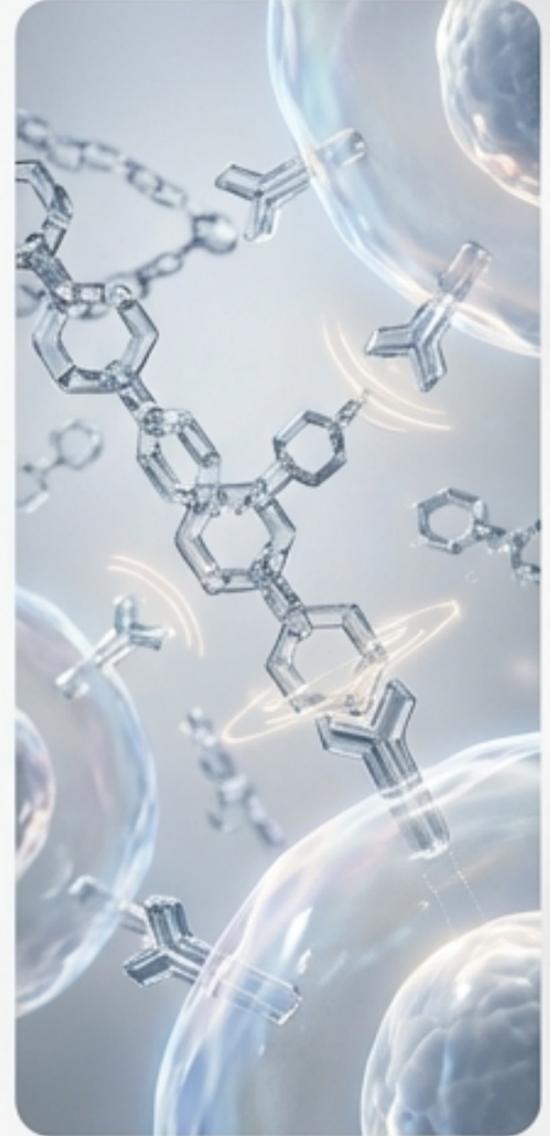

Role: DNA-Derived Regenerative Force.

Mechanism:

- **A2A Receptor Activation:** Activates adenosine receptors on fibroblasts to trigger tissue repair.
- **ECM Remodeling:** Synthesizes the scaffold, boosting Collagen and Elastin density.

Outcome: Visible pore reduction, increased dermal density, and accelerated wound healing.

The Regenerators (Peptide Complex)

Role: Bio-Mimetic Molecular Messengers.

Mechanism (Key Agents):

- **Acetyl Hexapeptide-8:** The Relaxer. Mimics botulinum toxin to modulate muscle signals.
- **sh-Oligopeptide-9:** The Vascular Communicator. Supports angiogenesis.
- **Octapeptide-4 & 7:** The Builders. Stimulate Collagen I, III, IV.
- **sh-Decapeptide-7:** The Proliferator. Accelerates turnover.

Clinical Protocol & Patient Outcomes

Patient Selection (Indications)

- Hyperpigmentation, Melasma, & Uneven Tone.
- Loss of Dermal Density & Enlarged Pores.
- Post-Procedure Recovery (requiring accelerated repair).
- Static and Dynamic Fine Lines.

The Regimen

- **Cleanse:** Prepare the skin.
- **Apply:** 2-3 pumps, massaged via upward strokes.
- **Protect:** Follow with moisturizer and broad-spectrum SPF.

Efficacy Timeline

“Unlock the radiance your patients were born with.
A complete system for cellular vitality.”
