

“Heal. Protect. Clarify.
Without Irritation.”

ACNECARE

REDEFINING ACNE TREATMENT: THE
ADVANCED BIO-INTELLIGENT AMPOULE.

PATHOGENESIS VS. SOLUTION

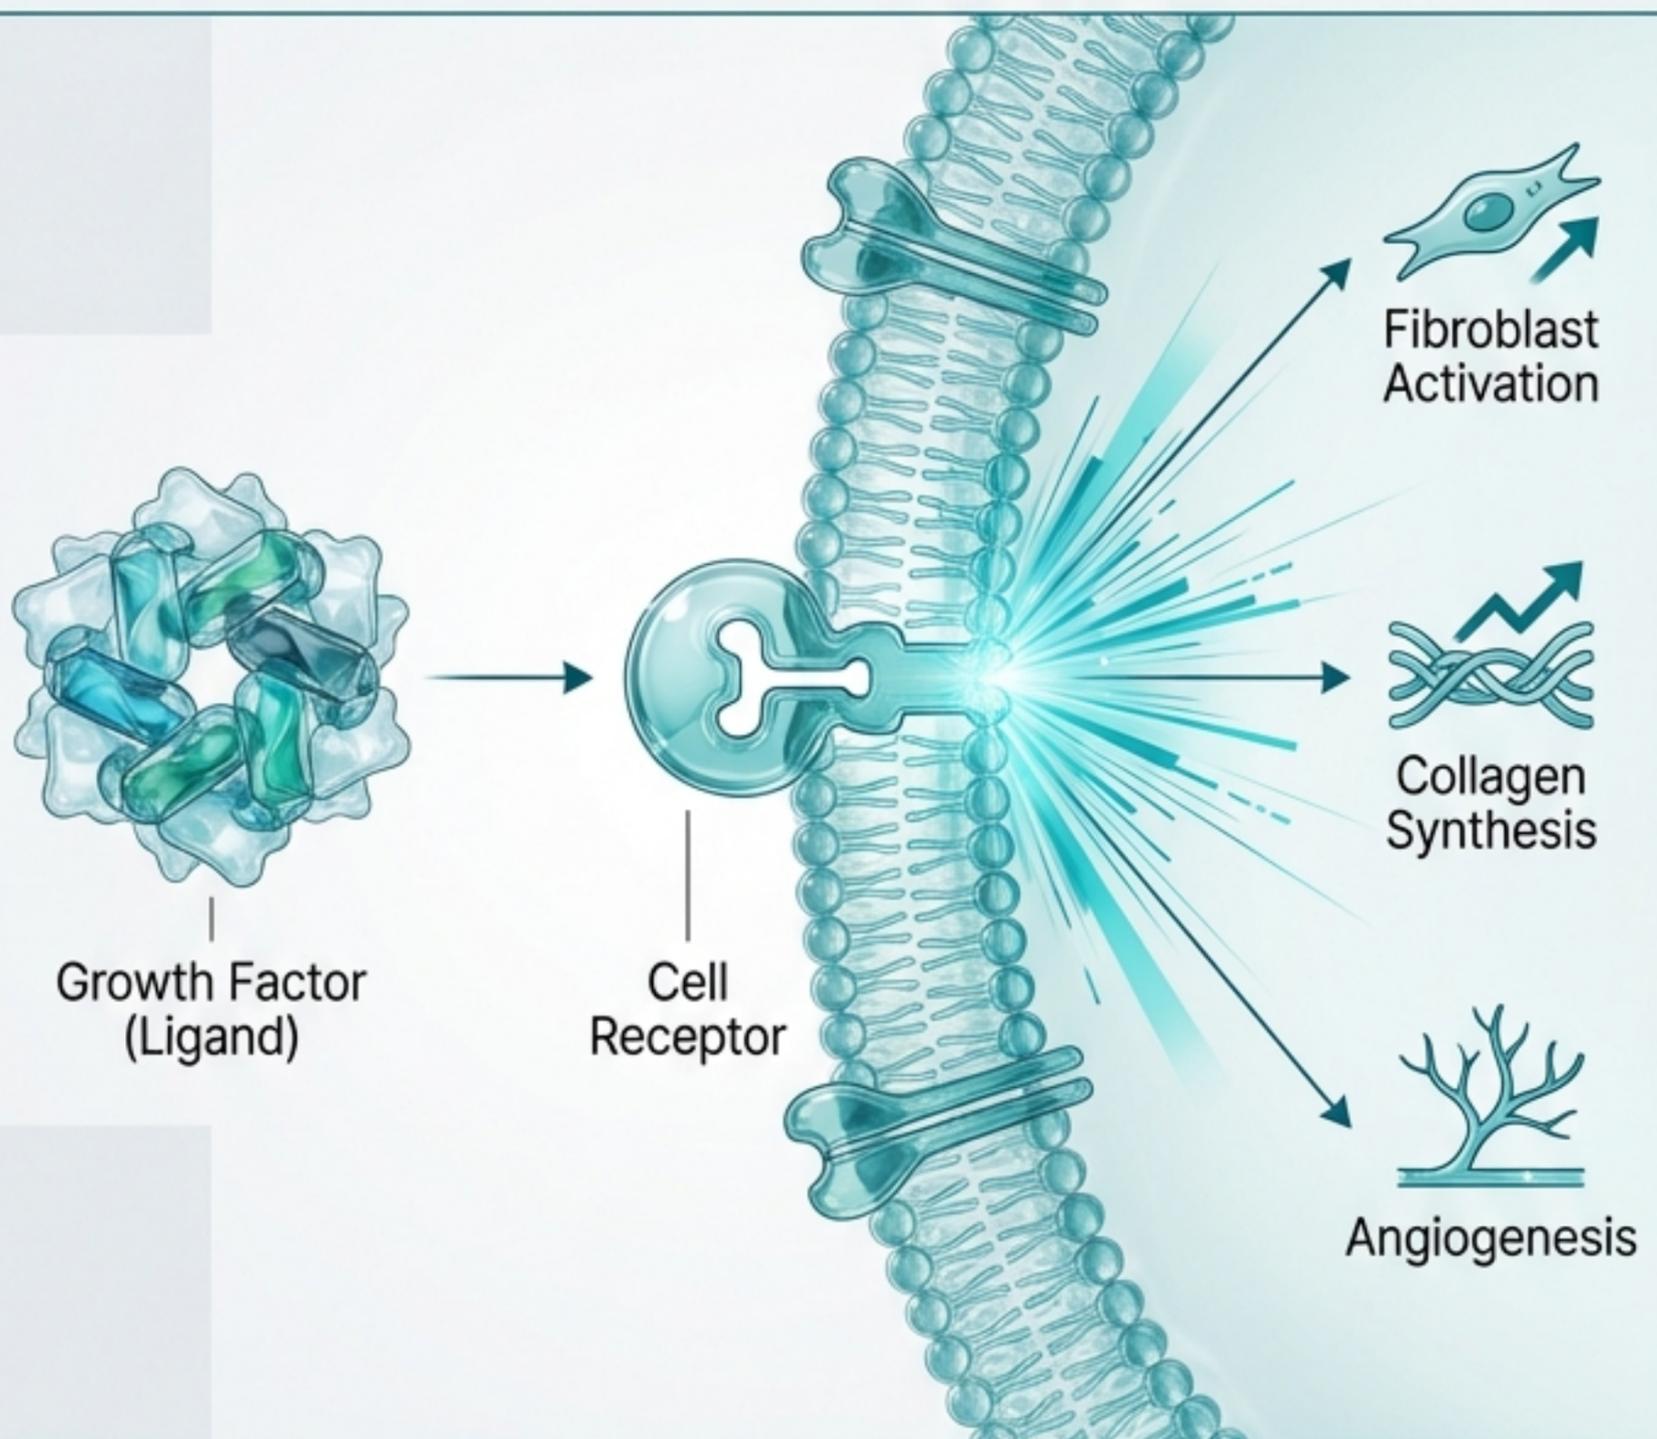

AcneCare signals a paradigm shift. We harness cellular biology to target acne pathogenesis—not with aggression, but with precision. By combining high-concentration Growth Factors, Biomimetic Peptides, and a balanced Acid Complex, we promote targeted clearance and immune fortification.

THE PHILOSOPHY:

- Address Root Causes: Sebum, Clogging, Bacteria.
- Promote Healing: Regenerative mechanisms to prevent scarring.
- Maintain Barrier integrity: Hydration and resilience.

MECHANISM OF ACTION I: CELLULAR REGENERATION & HEALING

The Architects of Renewal: High-Concentration Growth Factors.

IntoCell Growth Factors

IntoCell PLUS EGF	Accelerates keratinocyte proliferation; strengthens barrier; reduces PIH.
IntoCell IGF-1	Stimulates collagen synthesis; aids tissue repair; anti-inflammatory.
IntoCell aFGF & bFGF	Stimulates fibroblasts for collagen/ elastin; enhances wound healing.
IntoCell VEGFA	Promotes angiogenesis for nutrient delivery to damaged tissue.
IntoCell PDGFA	Stimulates fibroblast migration for tissue remodeling.

SUPPORTING BIO-ACTIVE FACTORS

- **Regenerative:** SCF, KGF-1, TGF- β 1 (Modulates scarring).
- **Protective & Hydrating:** SOD1 (Antioxidant), hBD3H (Antimicrobial), AQP-1.

CLINICAL OUTCOMES: Accelerated Wound Closure • Minimized Scarring • Reduced Inflammation

MECHANISM OF ACTION II: BIO-PROTECTIVE DEFENSE & EXFOLIATION

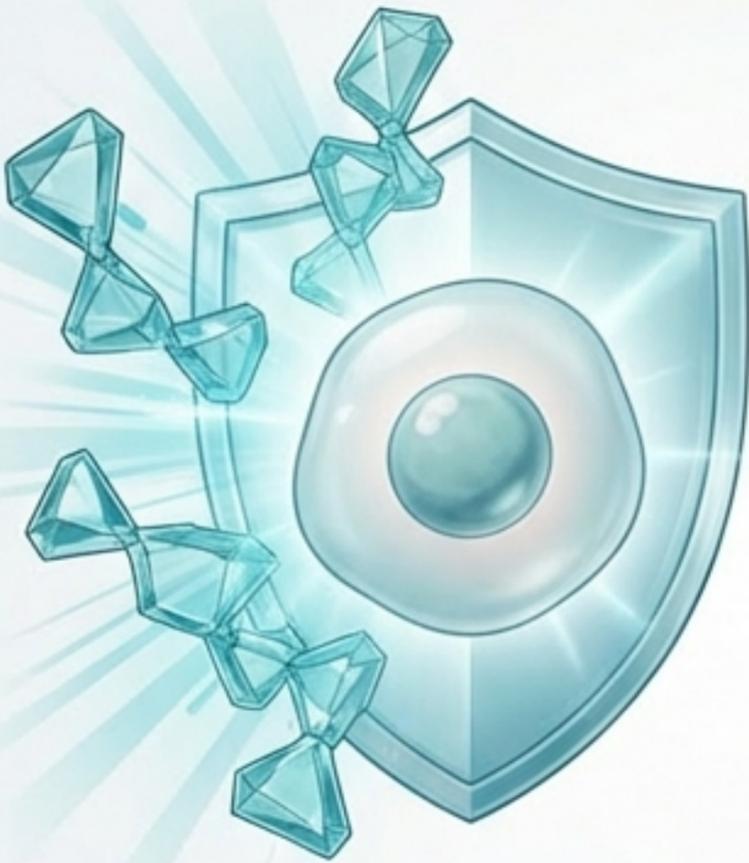

Immunity, Antimicrobial Action, and Pore Purification.

IMMUNITY

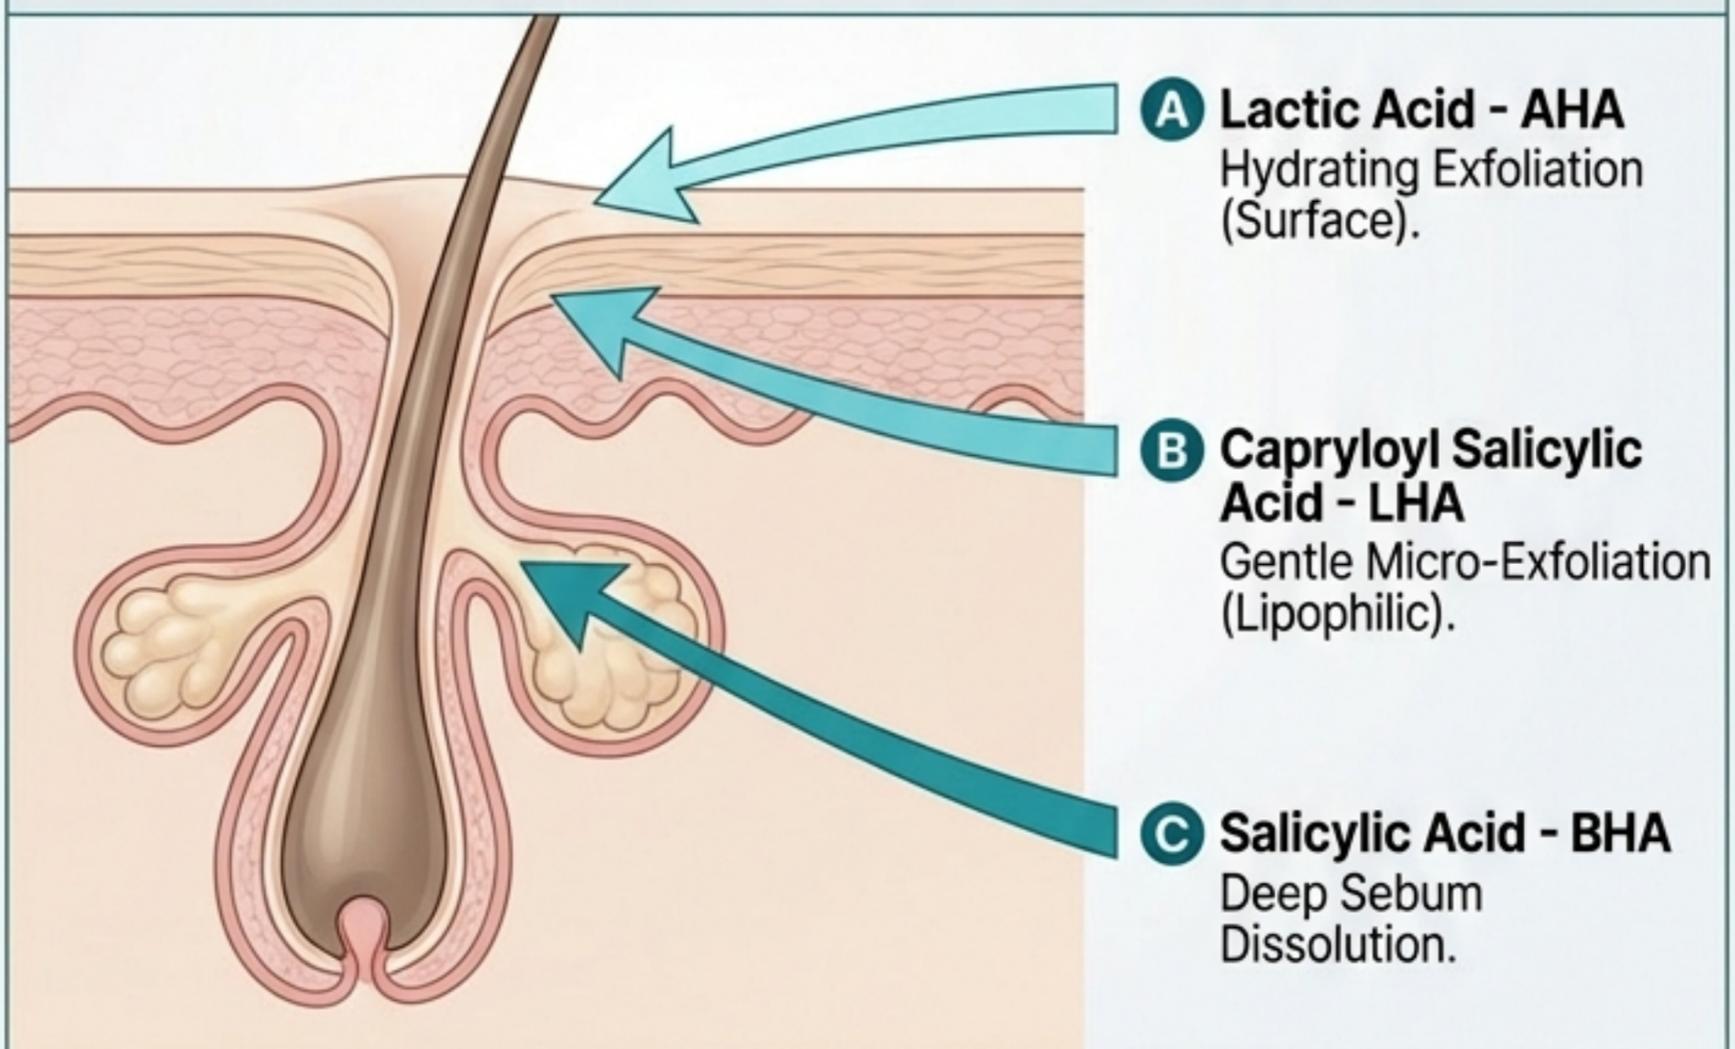

(The Bio-Protective Complex)

- **Phyto-NEP:** Mimics Neutral Endopeptidase to break down pro-inflammatory neuropeptides (Substance P). Directly reduces neurogenic inflammation.
- **Aurein:** Broad-spectrum Antimicrobial Peptide. Disrupts *P. acnes* cell membranes without resistance risks.
- **Copper Tripeptide-1:** Modulates immune cells and accelerates healing.
- **Glutathione:** The Master Antioxidant. Neutralizes free radicals and regulates melanin.

Holistic Treatment

PURIFICATION (The Multi-Acid System)

A Lactic Acid - AHA
Hydrating Exfoliation
(Surface).

**B Capryloyl Salicylic
Acid - LHA**
Gentle Micro-Exfoliation
(Lipophilic).

C Salicylic Acid - BHA
Deep Sebum
Dissolution.

RESULT: Clear pores and reduced bacterial load without the barrier damage of traditional harsh actives.

CLINICAL PROTOCOL & BENEFITS

Your Path to Lasting Clarity and Confidence.

Your Path to Lasting Clarity and Confidence.

THE REGIMEN

CLEANSE: Use a gentle, acne-safe cleanser.

TONE: Non-astringent toner (optional).

TREAT: AcneCare Ampoule. Pat and press evenly onto affected areas.

PROTECT: Non-comedogenic moisturizer + Broad-spectrum SPF.

PATIENT TIMELINE

WHY PRESCRIBE ACNECARE?

- **Holistic:** Targets Sebum, Bacteria, Inflammation, and Cellular Health.
- **Gentle Efficacy:** No dryness or irritation commonly associated with retinoids.
- **Professional Grade:** Designed for optimal performance in a medical regimen.
