

Meridelle

THE SCIENCE OF CELLULAR AESTHETICS

Comprehensive Product Portfolio Summary

Manufacturer & Biotechnology Innovator

The Meridelle Standard

Clinical Precision. Aesthetic Mastery.

Meridelle combines advanced biotechnology with aesthetic elegance.

As the primary manufacturer, we engineer solutions that target every layer of the facial anatomy—from muscular modulation to epidermal radiance.

EPIDERMIS

DERMIS

SUBCUTANEOUS

MUSCLE

A holistic ecosystem of 11 targeted formulations designed for the modern aesthetic practitioner.

Clinical Luxury

Restoring the Foundation

Regenerative Medicine & Polynucleotide (PN) Therapy

The Power of Polynucleotides

BioHeal

Structural Remodeling & Scar Repair

Key Ingredients: High-Concentration PN (25 mg/mL), HA (10 mg/mL), Lidocaine (3 mg/mL)

Mechanism: Stimulates A2A receptor-mediated fibroblast proliferation. Acts as a structural scaffold.

Indications: Atrophic acne scars, deep tissue repair, inflammaging, reversing skin laxity.

Lidocaine integrated for patient comfort.

ReJunex

Rejuvenation & Soothing

Key Ingredients: PDRN (Sodium DNA), Glutathione, 8-Cica Complex.

Mechanism: Powerful antioxidant action combined with wound-healing properties.

Indications: Skin soothing, rapid recovery, hydration, texture refinement.

Clinical Luxury

RegenBio: Synergistic Cellular Repair

The System

(Double Vial Protocol)

Vial 1: Sodium DNA (PDRN)
+ Hyaluronic Acid

Vial 2: Amino Acids + NMN
(Nicotinamide Mononucleotide)

Indications

- Photoaging & UV damage
- Compromised skin barrier
- Post-procedure recovery
- Wrinkle prevention

Clinical Luxury

Exosome Technology

The Next Generation of Cell Signaling

Clinical Luxury

Source Matters: The Exosome Portfolio

BioXome

Milk-Derived Exosomes

High biocompatibility and nutrient density. Ideal for deep restoration.

PhytoXome

Plant-Derived Exosomes

Botanical potency and vegan-friendly signaling. Focused on environmental defense.

Both formulations utilize advanced vesicle technology to deliver potent restorative signals.

Clinical Luxury

Illuminating the Skin Matrix

Hydration, Bio-Stimulation, and Radiance

Brightening vs. Firming

BioGloW

The Brightening Specialist

Ingredients:

Glutathione, PDRN, Growth Factors, Peptide Complex (Acetylcysteine Hexapeptide-8).

Indications:

Skin brightening, pore tightening, refining texture, 'Glass Skin' effect.

BioRadiance

Volume & Firmness

Ingredients:

Poly-L-Lactic Acid (PLLA 45mg), Hyaluronic Acid (13mg), Vitamins B6/B7.

Indications:

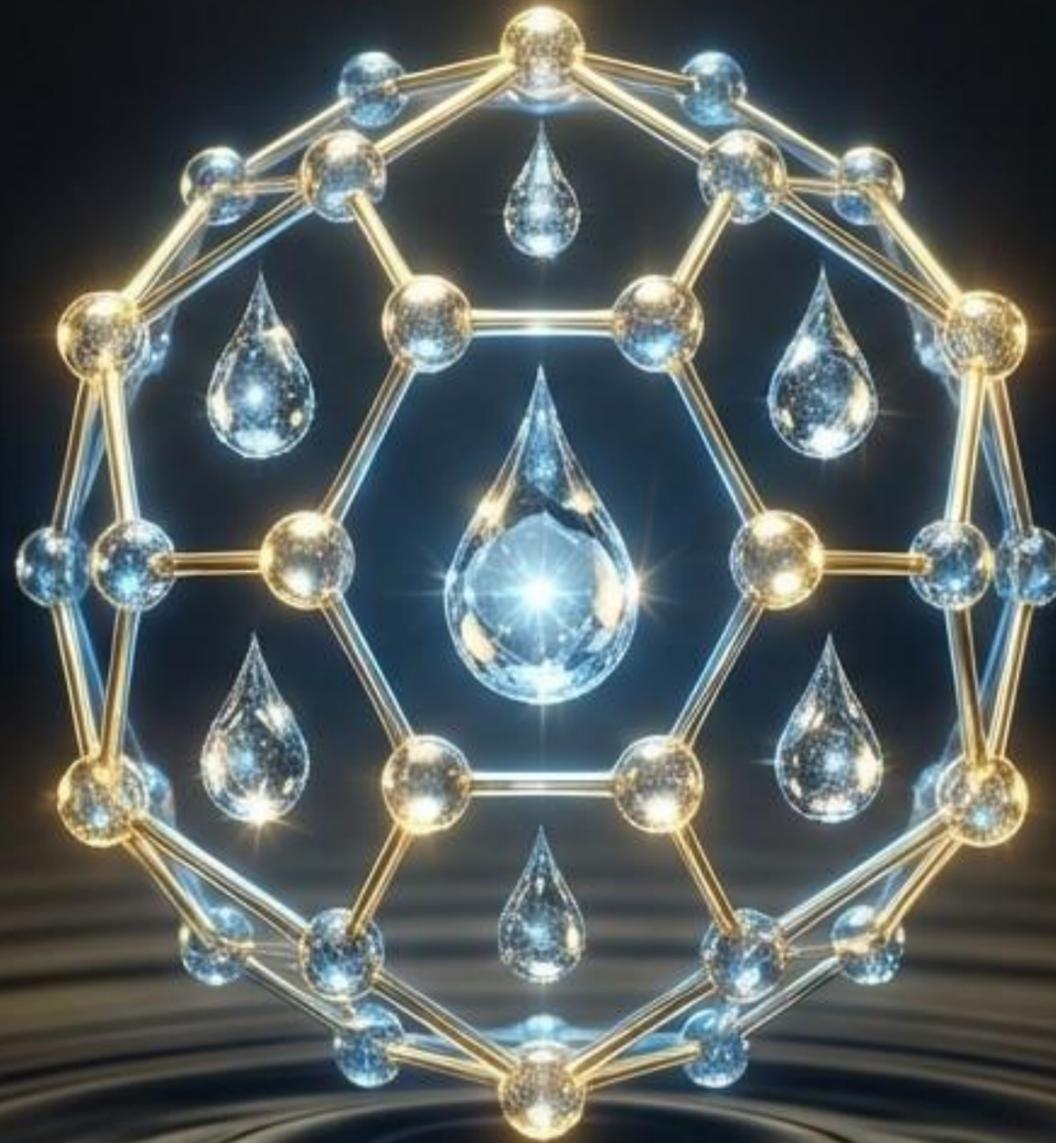

Loss of firmness, volume depletion, collagen induction, early aging.

BioBoost: Pure Hydro-Lifting

Formulation Strategy:

High Molecular Weight HA
(900–1400 kDa): 40mg

Low Molecular Weight HA
(100–600 kDa): 40mg

Dual-Action Mechanism:

Immediate surface hydration
combined with deep dermal
moisture retention.

Indications: Intense
hydration, elasticity
improvement.

Targeted Precision

Specialized Solutions for Specific Indications

Advanced Problem Solvers

AcneCare

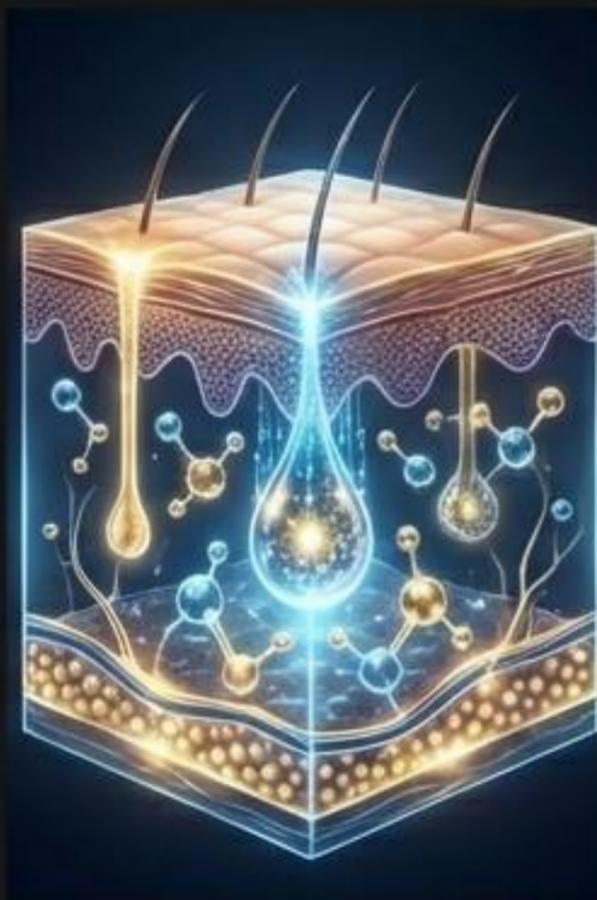

Antimicrobial Defense

Key Tech: IntoCell-Growth Factors (Enhanced Penetration).

Ingredients: IntoCell EGF/IGF/VEGF, Biomimetic Peptides, AHA/BHA.

Indications: Acne immunity, antimicrobial action, non-irritating clearing.

NADPro

Cellular Longevity

Key Ingredient: NAD+ (Nicotinamide Adenine Dinucleotide).

Indications: Mitochondrial support, cellular energy renewal, DNA repair support.

NeuroVive: Precision Neuromodulation

Class: Toxin / Drug

Active Ingredient: Clostridium botulinum toxin type A (900kDa)

Stabilizer: Human Serum Albumin

Aesthetic Indications:
Forehead lines, Glabellar lines,
Crow's feet.

Functional Indications:
Hyperhidrosis, Bruxism (Teeth
Grinding).

Portfolio Summary Matrix

Regeneration	BioHeal: Deep Repair 	ReJunex: Soothing 	RegenBio: Vial System 
Exosomes	BioXome: Milk-Derived 	PhytoXome: Plant-Derived 	
Glow & Volume	BioGloW: Brightening 	BioRadiance: PLLA Firming 	BioBoost: Hydro-Lifting 
Targeted	AcneCare: Acne Defense 	NADPro: Energy 	NeuroVive: Toxin
